Description:

## **Aeropole - Biopark:**

A sectorial approach is steering IGRETEC's future investments, among others in the field of real estate in order to set it in line with local strategic economic developments. This year, this process has already been initiated for the biotechnologies sector. A major project is currently in its study phase, which consists in the development of more than 20.000 m<sup>2</sup> of laboratories, offices and service spaces at the business park Aeropole in the medium term. Looking further ahead, the goal is to develop 40.000 m<sup>2</sup> in total. A masterplan has been set up and the draft project is currently being finalized. The implementation of this project will rely on public/private partnerships.
