Description:

Market studies for ERDF programming 2020-2027:

As part of the next ERDF 2020 - 2027 programme, the City of Seraing will launch four public service contracts in 2020 for the following projects:

1. Creation of a **connected and carbon-free entrance to the city** on the left bank of the Meuse (Jemeppe), including the arrival of the tram.

The study, estimated at €140,000, will cover urban, landscape, mobility and architectural aspects.

2. Creation of a **new train stop (on Line 125A) to serve the Val Saint Lambert project.**

Launch of a joint market between the City of Seraing and the Municipality of Flémalle
Estimated value of the study 50.000€.

3. **Renovation of the electrical power station in Ougrée.**

The study, estimated at €50,000, will cover: a building survey; a diagnosis of the state of the building; analyses of dangerous, toxic or polluting waste and materials and soil pollution: a budgeting for sanitation and rehabilitation

for all structural work.

4. Renovation of the "Rotonde", the only building maintained on the site of the former blast furnace (HF6).

The study, estimated at €50,000, will cover: a building survey; a diagnosis of the state of the building; analyses of dangerous, toxic or polluting waste and materials and soil pollution; a budgeting for sanitation and rehabilitation for all structural work.

Seeking

Urban planning and architectural design offices.

Timing

2020
