Description:

Master Plan Sambre Ouest :

In the West District on the Sambre's banks, the new « Stade du Pays de Charleroi » will be built surrounded by public facilities related to health and sports. On both sides of the river, a landscape structure will articulate nature and sustainable mobility.

Squares, parks and public facilities will be upgraded. On the economic zone on the right bank of the Sambre, the creation of an industrial bocage punctuated with plantations will host activities related to agri-food and the environment.

Surface area

114,67 Ha
