## Football stadium :

The "Charles Tondreau" stadium is the City's famous football stadium. Its current capacity is 12,662 seats. It has several galleries, offices, receptions spaces and parking areas. The priority for the city is to diversify the functions within the stadium. For the future, the ideal formula would be to find private partners who could develop mixed projects there, complementing sports infrastructure, such as housing, offices or shops. The city has currently launched a tender for projects on this site. The stadium takes magnificent views on the ancient city.
