## Grand'Large Marina:

The "Grand'Large" site, located at the gateway to the City's historic centre, is a lake we want to develop in a tourist destination. The proximity of the city center, its activities and shops favors the lengthening of stays . It has many advantages:

- Easy accessibility from the highway,
- Land available,
- Very busy marina thanks to its proximity to the city center of Mons and leisure facilities (cinema, shopping center, etc.),

- Presence of important sports infrastructures: swimming pool, skate Park, ...

It is also an important node for soft traffic and, more particularly, for cycle traffic, serving several strategic areas and facilities. in the territory and linking the Borinage, this confirming the major role that the Grand'Large plays in the framework of the territorial development of the City of Mons .
