Ecopole :

Sustainable development and the circular economy frame all the developments of the ECOPOLE business park.

ECOPOLE is a space of experience and innovation whose objective is to contribute to the redeployment of the local and circular economy. It aims to offer a better quality of life to its occupants through attractive site layouts, quality, practical and inspiring workspaces and high levels of services.

The Ecopole is a space involving :

- Companies, their partners (sales, logistics, etc.) and all actors in economic development

- Public and institutional actors (municipalities, Wallonia, etc.)
- IGRETEC
- Local residents and visitors

Everyone has the opportunity, at their level, to contribute and participate :

- Developing and managing an exemplary, sustainable and circular fleet;
- Setting up new businesses by offering an attractive setting;
- To create and strengthen links between all the actors in the region;
- Optimal management of natural resources, energy, transportation and development.

Settling on this park? It's still possible!

Ecopole still offers 73 hectares of available space
