Description:

European Industrial Park Brussels South Charleroi:

The infrastructures of the European Industrial Park Brussels South Charleroi, formerly "Caterpillar" production site, allow the immediate start of a wide range of activities. With its unique location at the heart of the highway network (E420/E42) and close to Brussels South Charleroi Airport, the site covers 92 ha, 25 ha of which consists of existing industrial facilities.

Sales actions are currently being undertaken for this site on both greenfield and brownfield parts. Mainly because of its location and size, this site represents a unique opportunity for any investor or developer willing to implement a major project.

Surface area

92 hectares (227 acres)
