Aeropole :

Located at the centre of an important communications network, in direct proximity to Brussels South Charleroi Airport, the 95-hectare Aeropole Science and Technology Park is a real engine of economic development in Charleroi Métropole. It is now home to more than 170 companies employing more than

4,000 workers in high value-added sectors such as aeronautics, information and communication technologies, industrial engineering and biotechnologies.

THE BIOPARK, A CAROLO SUCCESS STORY

Central to the Aéropole and often called the Walloon Biotech Valley, the BioPark is a success story, with more than 3,200 employees, 90 biotech players, 3 research institutes and 1.5 billion transactions in 2021. The arrival of major players today gives it an international dimension.

Settling on this park ? It's still possible!

The Aeropole still offers 7 hectares of available space at a price of 40.60 EUR/sqm
