Genk Green Logistics :

Genk Green Logistics is a full new development project at zone B (42 hectares) of the former Ford car factory in Genk. It is one of the few sites in Belgium suitable for XXL logistic developments and a top location for e-commerce.

Genk Green Logistics will consist of a state-of-the-art logistics and semi-industrial complex of approximately 250.000 m² after full new development. The surface will be developed in phases that can function independently of each other. The buildings are for rent in units from 8.000 m².
