Panier Vert Green Business Park : a sustainable vision for SMEs

Panier Vert Green Business Park is a forward-thinking project designed to meet the needs of small and medium-sized enterprises (SMEs). Strategically located in a dynamic economic zone, this development

features modular units customised for production, storage, and office use. BVI.EU is actively seeking partners and investors to help realise this innovative project and drive local economic growth.

Sustainability is at the heart of Panier Vert Green Business Park. The project integrates energy-efficient technologies, including advanced insulation and LED lighting, along with renewable energy solutions such as solar panels. Thoughtfully designed green spaces further enhance biodiversity while creating a pleasant and inspiring work environment.

Ideally located on premium land with high visibility from the E19 and close proximity to Shopping Nijvel, Panier Vert Green Business Park offers excellent connectivity to major transport networks. This strategic positioning makes it an ideal base for businesses looking to grow. Combining innovation, sustainability, and accessibility, the project represents a unique investment opportunity.
