MG Park Brussels East:

MG Park Brussels East is a strategic logistics development located in Zaventem, just minutes from Brussels Airport and directly connected to the E40 motorway and the R0 ring road. Its proximity to major logistics operators positions it as an ideal site for companies active in transport, distribution, and airport-related activities.

The site covers 129,490 sqm of land, with a planned building footprint of 61,230 sqm combining modern functionality, operational efficiency and high environmental standards. Sustainability is a key component of the project. MG Park Brussels East integrates extensive green zones that support biodiversity, naturally collect and infiltrate rainwater, and contribute to a balanced ecosystem.

The development will prioritise energy efficiency, sustainable materials and modern technical installations that reduce environmental impact. Architectural quality and landscape integration ensure a functional, future-proof and aesthetically refined logistics environment.
