Martin Pecheur Suite:

This hotel suite, completed within the Martin's Hotel at the Château du Lac in Genval, presents a chic and contemporary interpretation of high-end hospitality.

The project was carried out in close collaboration with the architectural firm Champels, with a shared

focus on achieving the right balance between elegance, comfort, and a distinctive identity.

Our intervention as interior millworkers covered the full scope of custom-made furniture.
The centrepiece of the suite a solid oak four-poster bed combined with a leather headboard anchors the room with presence and refinement.
The bedside tables, TV cabinet, and entrance console, crafted in walnut and black-stained oak, enrich the space with sophisticated contrasts and a thoughtful interplay of materials.

In the bathroom, the walnut vanity adds warmth and nobility to the wellness area, while the walnut dressing with a metal structure introduces a contemporary, architectural touch.
Every detail was carefully considered to offer guests a unique and elevated experience.

This suite perfectly illustrates our expertise in high-end bespoke joinery, where made-to-measure becomes an architectural tool shaping the atmosphere, enhancing comfort, and elevating the overall aesthetic.

Installation completed: 2022
