Garocentre, Logistics Multimodal Park of the Heart of Hainaut :

Developed by IDEA at the very heart of the transportation European network, GAROCENTRE, the Multimodal Logistics Park of the Heart of Hainaut, benefits from a concentration of 60% of the European purchase capacity within a 48-hours' drive, at a moderate cost.

IDEA sets at investors' disposal as well land for sale as relay-buildings for rent, in a green environment (landscaping and wind turbines), with the support of services dedicated to the sector of logistics.

GAROCENTRE has a multimodal container terminal connecting Antwerp by barges and train with a service of daily shuttle.

Plots of land from 2 to 6 hectares enabling the construction of 10 to 25.000 sq.m. distribution centers, are still immediately available for developers and end-users.

Smaller buildings will take place on a complementary 15 hectares-area that will be developed from 2028. An old relay building will be renovated and extended at the entrance to the zoning area by 2029.
