Willy Naessens Group - Headquarters:

With Willy Naessens Build, the Willy Naessens Group specialises in the construction of buildings for SMEs, logistics buildings, distribution centres, offices, commercial spaces, garages, agricultural buildings and swimming pools. The Willy Naessens Group model can be said to serve as the model for the perfect building system, both structurally and aesthetically, and for virtually any application. Thanks to total vertical integration the construction companies under the Willy Naessens Group do everything in-house, from design and production to transport and assembly, which is reflected in over 7000 projects already completed.
